

INDEX TO VOL. LXXXVIII. (A)

- Address of the President, Sir A. Geikie, 1.
Allen (H. S.) The Photo-electric Behaviour of Iron in the Active and Passive State, 70.
Alpha-particles, decrease of velocity in passing through matter (Marsden and Taylor), 443.
Ammonium ferrous sulphate and its alkali-metal isomorphs (Tutton), 361.
Armstrong (H. E.) and Eyre (J. V.) Studies of the Processes operative in Solutions.
XXV.—The Influence of Non-electrolytes on Solubility. The Nature of the Processes of Dissolution and Precipitation, 234.
Armstrong (H. E.) and Walker (E. E.) Studies of the Processes operative in Solutions.
XXVII.—The Causes of Variation in the Optical Rotatory Power of Organic Compounds and of Anomalous Rotatory Dispersive Power, 388.
Azoimide, electrical and chemical effects of explosion of (Kirkby and Marsh), 90.
Barlow (G.) On a New Method of Measuring the Torque produced by a Beam of Light in Oblique Refraction through a Glass Plate, 100.
Bousfield (W. R.) Ionic Size in Relation to Molecular Physics, together with a New Law relating to the Heats of Formation of Solid, Liquid, and Ionic Molecules, 147.
Bovey (H. T.) Obituary notice of, x.
Bragg (W. H. and W. L.) The Reflection of X-rays by Crystals, 428.
Bromine, viscosity of (Rankine), 575.
Brown (John) Obituary notice of, vi.
Burbury (S. H.) Obituary notice of, i.
Cane sugar, etc., influence of acids on rotatory power of (Worley), 439.
Cassegrain reflector with corrected field (Sampson), 188.
Chadwick (J.) and Russell (A. S.) The Excitation of γ -Rays by the α -Rays of Ionium and Radiothorium, 217.
Chapman (J. C.) A Comparison of the Spectra of Fluorescent Röntgen Radiations, 24.
Chlorine and bromine, crystalline properties of (Wahl), 348.
Colour vision, luminosity curves in normal and abnormal (Watson), 404.
Cook (G.) See Robertson and Cook.
Crystal symmetry of organic compounds and molecular constitution (Wahl), 354.
Crystallisation and melting- and freezing-point curves of two substances which form mixed crystals, etc. (Isaac), 205.
Crystallographic properties of hydrogen and oxygen (Wahl), 61.
Dalby (W. E.) Load-extension Diagrams taken with the Optical Load-extension Indicator, 281.
Dalrymple-Hay (Sir J. C.) Obituary notice of, xii.
Divers (E.) Obituary notice of, viii.
Dover tidal observations, 1883-84 (Roberts), 230.
Electric discharge in gases, etc., duration of luminosity of (Strutt), 110.
Electric waves, effect of junctions on propagation of, along conductors (Rayleigh), 103.
Electrical emissivity and disintegration of hot metals (Harker and Kaye), 522.
Electrolytes, Hall effect in liquid (Oxley), 588.
Electrons in gases, motions of (Townsend and Tizard), 336.
Emissivity of copper and silver, compared with that of a full radiator (Stubbs), 195.

- Explosion of azoimide, electrical and chemical effects of (Kirkby and Marsh), 90.
 Eyre (J. V.) See Armstrong and Eyre.
- Fluorescence spectrum of iodine vapour (McLennan), 289.
 Fluorescent Röntgen radiations, spectra of (Chapman), 24.
 Fourier series, formation of usually convergent (Young), 178 ; — and functions of bounded variation (Young), 561.
 Functions of bounded variation (Young), 561.
- Gamma-rays from radium C, penetrating power of (Russell), 75 ; — excitation of, by α -rays of ionium and radiothorium (Chadwick and Russell), 217.
- Gases, optical investigation of solidified —, chlorine and bromine (Wahl), 348.
- Geikie (Sir A.) Presidential Address by, November 30, 1912, 1.
- Glucosamines, synthesis of anhydrides of α -aminoacyl (Weizmann and Hopwood), 455.
- Griffiths (E. H. and E.) The Capacity for Heat of Metals at Different Temperatures, 549.
- Hall effect in liquid electrolytes (Oxley), 588.
- Hardy (W. B.) The Influence of Chemical Constitution upon Interfacial Tension, 303 ; — The Tension of Composite Fluid Surfaces.—No. II, 313.
- Harker (J. A.) and Kaye (G. W. C.) On the Electrical Emissivity and Disintegration of Hot Metals, 522.
- Harrison (W. J.) The Motion of Viscous Liquid due to Uniform and Periodic Motion maintained over a Segment of an Infinite Plane Boundary, 13.
- Hay (Sir J.) See Dalrymple-Hay.
- Heat, capacity for, of metals (Griffiths), 549.
- Hopwood (A.) See Weizmann and Hopwood.
- Horton (F.) The Positive Ionisation produced by Platinum and by certain Salts when heated, 117.
- Hydrogen and oxygen, crystallographic properties of (Wahl), 61.
- Integration, new theory of (Young), 170.
- Iodine vapour, fluorescence spectrum of (McLennan), 289.
- Ion in gas, abnormal kinetic energy of (Pidduck), 296.
- Ionic size in relation to molecular physics (Bousfield), 147.
- Ionisation produced by platinum and certain salts when heated (Horton), 117.
- Ions, recombination of, produced by Röntgen rays in gases, etc. (Thirkill), 477.
- Iron, photo-electric behaviour of, in active and passive state (Allen), 70.
- Isaac (F.) On the Spontaneous Crystallisation and the Melting- and Freezing-point Curves of two Substances which form Mixed Crystals, etc., 205.
- Jervis-Smith (F. J.) Obituary notice of, iv.
- Jones (H. S.) The Flexure of Telescope Mirror-discs arising from their Weight, and its Influence upon Resolving Power, 494.
- Kaye (G. W. C.) See Harker and Kaye.
- Keene (H. B.) A Determination of the Radiation Constant, 49.
- King (L. V.) On the Scattering and Absorption of Light in Gaseous Media, with Applications to the Intensity of Sky Radiation, 83.
- Kirkby (P. J.) and Marsh (J. E.) Some Electrical and Chemical Effects of the Explosion of Azoimide, 90.
- Light, method of measuring torque produced by beam of, in oblique refraction (Barlow), 100 ; — scattering and absorption of, in gaseous media (King), 83.
- Liquid, motion of viscous (Harrison), 13.
- Load-extension indicator diagrams (Dalby), 281.
- Luminosity curves in normal and abnormal colour vision (Watson), 404.

- McLennan (J. C.) On a Fluorescence Spectrum of Iodine Vapour, 289.
- Magnetic behaviour of iron and other metals under oscillatory discharge (Marchant), 254.
- Magnetism, new expression for components of diurnal variation of terrestrial (Walker), 191.
- Mallock (A.) A Simple Method of finding the Approximate Period of Stable Systems, 333.
- Marchant (E. W.) An Investigation into the Magnetic Behaviour of Iron and some other Metals under the Oscillatory Discharge from a Condenser, 254.
- Marsden (E.) and Taylor (T. S.) The Decrease in Velocity of α -Particles in passing through Matter, 443.
- Marsh (J. E.) See Kirkby and Marsh.
- Medallists 1912, 8.
- Metals, capacity for heat of (Griffiths), 549; — electrical emissivity, etc., of hot (Harker and Kaye), 522.
- Molecular constitution and crystal-symmetry (Wahl), 354.
- Molecules, new law relating to heats of formation of (Bousfield), 147.
- Moseley (H. G. J.) The Attainment of High Potentials by the Use of Radium, 471.
- Nitrogen, active modification of (Strutt), 539.
- Obituary Notices :—
- Burbury (S. H.), i.
 - Jervis-Smith (F. J.), iv.
 - Brown (John), vi.
 - Divers (E.), viii.
 - Bovey (H. T.), x.
 - Dalrymple-Hay (Sir J. C.), xii.
 - Reynolds (O.), xv.
- Oxley (A. E.) The Hall Effect in Liquid Electrolytes, 588.
- Photo-electric behaviour of iron (Allen), 70.
- Pidduck (F. B.) The Abnormal Kinetic Energy of an Ion in a Gas, 296.
- Radiation constant, determination of (Keene), 49.
- Radium, high potentials by use of (Moseley), 471.
- Radium C, penetrating power of γ -rays from (Russell), 75.
- Rankine (A. O.) On a Method of measuring the Viscosity of the Vapours of Volatile Liquids, with an Application to Bromine, 575.
- Rayleigh (Lord). The Effect of Junctions on the Propagation of Electric Waves along Conductors, 103.
- Reynolds (J. E.) The Synthesis of a Silicalcyanide and of a Felspar, 37.
- Reynolds (O.) Obituary notice of, xv.
- Roberts (E.) Re-reduction of Dover Tidal Observations, 1883–84, etc., 230.
- Robertson (A.) and Cook (G.) The Transition from the Elastic to the Plastic State in Mild Steel, 462.
- Rotatory power of compounds, causes of variation in (Armstrong and Walker), 389; — of cane sugar, etc., influence of acids on (Worley), 439.
- Russell (A. S.) The Penetrating Power of the γ -Rays from Radium C, 75. (See also Chadwick and Russell.)
- Sampson (R. A.) On a Cassegrain Reflector with Corrected Field, 188.
- Silicalcyanide and felspar, synthesis of (Reynolds), 37.
- Solutions, studies of processes operative in, XXV (Armstrong and Eyre), 234; XXVI (Walker), 246; XXVII (Armstrong and Walker), 388; XXVIII (Worley), 439.

- Spectra of fluorescent Röntgen radiations (Chapman), 24.
- Stable systems, simple method of finding approximate period of (Mallock), 333.
- Steel, transition from elastic to plastic state in mild (Robertson and Cook), 462.
- Strutt (Hon. R. J.) Duration of Luminosity of Electric Discharge in Gases and Vapours, 110 ; — An Active Modification of Nitrogen, produced by the Electric Discharge.—V, 539.
- Stubbs (C. M.) A Spectro-photometric Comparison of the Emissivity of Solid and Liquid Copper and of Liquid Silver at High Temperatures with that of a Full Radiator, 195.
- Taylor (T. S.) See Marsden and Taylor.
- Telescope mirror-discs, flexure arising from weight, influence on resolving power (Jones), 494.
- Tension, chemical constitution and interfacial (Hardy), 303 ; — of composite fluid surfaces (Hardy), 313.
- Thirkill (H.) On the Recombination of the Ions produced by Röntgen Rays in Gases and Vapours, 477.
- Tidal observations, Dover, 1883–84, re-reduction of (Roberts), 230.
- Tizard (H. T.) See Townsend and Tizard.
- Torque produced by beam of light in oblique refraction, method of measuring (Barlow), 100.
- Townsend (J. S.) and Tizard (H. T.) The Motion of Electrons in Gases, 336.
- Trigonometrical series, condition that a, should have a certain form (Young), 569.
- Tutton (A. E. H.) Ammonium Ferrous Sulphate and its Alkali-metal Isomorphs, 361.
- Vapours of volatile liquids, method of measuring viscosity of (Rankine), 575.
- Wahl (W.) Optical Investigation of Solidified Gases. II.—The Crystallographic Properties of Hydrogen and Oxygen, 61 ; III.—The Crystalline Properties of Chlorine and Bromine, 348 ; — The Relation between the Crystal Symmetry of the Simpler Organic Compounds and their Molecular Constitution.—Part I, 354.
- Walker (E. E.) Studies of the Processes operative in Solutions. XXVI.—The Disturbance of the Equilibrium in Solutions of Fructose by Salts and by Non-electrolytes, 246. (See also Armstrong and Walker.)
- Walker (G. W.) On a new Analytical Expression for the Representation of the Components of the Diurnal Variation of Terrestrial Magnetism, 191.
- Watson (W.) On the Luminosity Curves of Persons having Normal and Abnormal Colour Vision, 404.
- Weizmann (C.) and Hopwood (A.) Synthesis of the Anhydrides of α -Aminoacyl Glucosamines, 455.
- Worley (F. P.) Studies of the Processes operative in Solutions. XXVIII.—The Influence of Acids on the Rotatory Power of Cane Sugar, of Glucose, and of Fructose, 439.
- X-rays, reflection of, by crystals (Bragg), 428.
- Young (W. H.) On the New Theory of Integration, 170 ; — On the Formation of usually Convergent Fourier Series, 178 ; — On Fourier Series and Functions of Bounded Variation, 561 ; — On a Condition that a Trigonometrical Series should have a certain Form, 569.

END OF THE EIGHTY-EIGHTH VOLUME (SERIES A).
